Configurable AME Repair Depot (CARD)

Self-Contained Horizontal Sustainment Solution for 5th Generation & Legacy Aircraft

Features

- Supply “one-stop” repair capability for all AME used across multiple platforms and aircraft including equipment fault isolation, repair, and repair validation.
- Support multiple airbases with fewer dedicated facilities where applicable.
- Provide mobile repair capability for all AME without the need for a permanent dedicated building.
- Shorter repair turn-around times for all AME due to reduced transportation and consolidation of repair resources.
- CARD philosophy can be utilized in support of all levels of logistics.
